

Software handover and end user licence agreement

BSCW server software

July, 2015

OrbiTeam Software GmbH & Co. KG
Endenicher Allee 35
53121 Bonn
Germany

(referred to hereinafter as 'OrbiTeam')

The following translation is for information only. The original and legally binding version is the German version.

Special Conditions – BSCW Professional/Government

1. Relationship of Special Conditions to General Conditions

These Special Conditions apply in addition to the General Conditions. Where the General Conditions and the Special Conditions contain conflicting provisions, the Special Conditions shall take precedence over the General Conditions.

2. Permitted uses of the software

- (1) The BSCW Professional/Government licence is for the use of public authorities only.
- (2) The software may only be used for purposes directly linked to the licensee's remit in the field of public administration. Any use of the software outside of this purpose, in particular commercial use, is not permitted to the licensee.

3. Addendum to Section 2 of the Terms and Conditions: Conclusion of contract, conditions of use

- (1) OrbiTeam shall initially provide a temporary licence code. The temporary licence code shall be valid for a period of 90 days. OrbiTeam shall supply the final licence code immediately after receipt of payment.
- (2) Following expiry of the validity period of the temporary licence code, OrbiTeam may limit the licensee's access to the software to read-only processes until payment is made.

4. Addendum to Section 3 of the Terms and Conditions: Contract duration

Unless the parties have reached any agreement to the contrary, the provision period shall be one year. The contract shall expire at the end of the provision period without the need for termination. If a subscription to the licence has been purchased, the licence shall be automatically extended by one year as long as it is not cancelled.

5. Addendum to Section 4 of the Terms and Conditions: Payment

The amount payable for BSCW Professional/Government is dependent upon the number of users and shall be agreed separately by the parties.
